PROJECTS

20 Day	Friendmap It is an android application which can be used among friends to share locations amongst each other. It uses barcode scanning for adding each other and the backend is built on firebase. It also has some cool features like geofencing which can be used to set up hangout places among friends.
3 Month	Impulse

Full stack web developer

Impulse is the name of the tech fest of my college. I contributed in building the website from scratch. It can be viewed at impulseiosd.tech

Sunrise Animation

Android app built to practice android animations.
<http://github.com/sidkathuria14/Sunrise-Animation>

Chatbot

Built using dialogflow. Takes food orders from customers like used by Dominoz.
<http://github.com/sidkathuria14/sandwich-maker-dialogflow>

Face Recognition

An Android application which recognises faces from images which can either be uploaded from device or clicked by device camera. Google vision library was used for the app

Some Basic Projects

I have made some basic projects like DICTIONARY, A NEWS application, A Url shortener .

1 Day

SafeU

SafeU is a women safety application which lets users rate an area as dangerous or safe and the collective data from users is used to mark an area as safe or dangerous. This app also has various other features.
